Table of Contents, Volume 21

Number 1, March 1975

Effect of site quality and initial stocking density on average diameter in black wattle plantations in Kenya ..... *A. P. G. Schönau* 2

Impact of length-of-run on price elasticities for Douglas-fir and southern pine lumber ..... *Thomas J. Mills* 13

Stem anatomy of 30-year-old yellow-poplar ..... *A. N. Foulger, J. P. Vimmerstedt, Cynthia Eichar* 23

Mycorrhizae and soil microflora in a green-tree reservoir ..... *T. H. Filer, Jr.* 36

Instant- and interval-count sampling: two new techniques for estimating recreation use ..... *H. T. Schreuder, G. L. Tyre, G. A. James* 40

Competition ratio dynamics for improved mortality estimates in simulated growth of forest stands ..... *T. D. Keister, G. R. Tidwell* 46

Water conduction in lateral roots of red pine ..... *J. E. Stone, E. L. Stone* 53

Clonal variation in monoterpene hydrocarbons of vapors of Douglas-fir foliage ..... *M. A. Radwan, W. D. Ellis* 63

Drought tolerance of pine seedlings under various climatic conditions ..... *D. Heth, Paul J. Kramer* 72

Crown-fire potential in a sequoia forest after prescribed burning ..... *Bruce M. Kilgore, Rodney W. Sando* 83

Four-year growth responses of plantation red pine to potash fertilization and irrigation in New York ..... *Albert L. Leaf, Raymond E. Leonard, Robert F. Wittwer, Donald H. Bickelhaupt* 88

Notes

Tree strata biomass of subalpine spruce-fir stands in southwestern Colorado ..... *Thomas D. Landis, E. W. Mogren* 9

Effect of lead contamination on transpiration and photosynthesis of loblolly pine and autumn olive ..... *G. L. Rolfe, F. A. Bazzaz* 33

Method for removing wood samples from trees ..... *E. Bauer* 51

Effect of repeated drying and rewetting on laboratory germination of stratified loblolly pine seed ..... *Robert E. Adams* 61

A class-interval-free method for obtaining expected yields from diameter distributions ..... *Mike R. Strub, Harold E. Burkhart* 67

Comment on paper by William A. Leuschner "An econometric analysis of the Wisconsin aspen pulpwood market" ..... *David C. Lothner* 70

Reply on comment by David C. Lothner ..... *William A. Leuschner* 71

Reviews

Ecology and reclamation of devastated land. *Review by Stephen G. Boyce* 44

A new ecophysiological approach to forest-water relationships in arid climates. *Review by R. Lee* 69

Notice

Directory of tree seed workers to be published 45

Announcement

Earth resources capability of the Defense Meteorological Satellite Program ..... *Henry W. Brandli* 60

Number 2, June 1975

Canopy-understory interaction effects on forest population structure ..... *F. Glenn Goff, Darrell West* 98

Optimal policies for managed stands: an infinite horizon Markov decision process approach ..... *Mark R. Lembersky, K. Norman Johnson* 109

Meiotic pairing and chromosome morphology in American elm ..... *Robert P. Karrfalt, David F. Karnosky* 123

Report on lysimeter studies at San Dimas Experimental Forest ... *James H. Patric* 195

Notice

Conference on karst ... 200

Number 3, September 1975

Comparative physiology of eastern and western white pines: oleoresin composition and viscosity ... *James W. Hanover* 214

Cobalt accumulation and circulation by blackgum trees ... *William A. Thomas* 222

Variation in tolerance of American elm to the Verticillium wilt fungus ... *D. T. Lester* 227

A simulation model of gypsy moth-forest interaction ... *H. T. Valentine, R. W. Campbell* 233

Early root development and anatomical parasite-host relationships of black senna with slash pine ..... *C. H. Fitzgerald, M. Reines, S. Terrell, P. P. Kormanik* 239

Growth and ectomycorrhizal development of loblolly pine seedlings in fumigated soil infested with the fungal symbiont *Pisolithus tinctorius* ..... *Donald H. Marx, William C. Bryan* 245

The communal root system of red pine: water conduction through root grafts ..... *J. E. Stone, E. L. Stone* 255

Distribution of carbohydrates in deformed seedling root systems ..... *Ronald L. Hay, Frank W. Woods* 263

Bud and cambial activity in Douglas-fir as related to stem cutting rootability ..... *H. S. Bhella, A. N. Roberts* 269

Genetic variation and heritability of Melampsora leaf rust resistance in eastern cottonwood ..... *Bart A. Thielges, John C. Adams* 278

Moisture stress and composition of xylem oleoresin in loblolly pine ..... *John D. Hodges, Peter L. Lorio, Jr.* 283

Black walnut seedling growth in wind protected microenvironments ..... *Randall Heiligmann, G. Schneider* 293

A model of pulpwood production and trade in Wisconsin and the Lake States ..... *Darius M. Adams* 301

Effect of night temperature on dehardening in black walnut seedlings ..... *Gordon Murray, William R. Byrnes* 313

Phenotypic variation of trembling aspen in western North America ..... *Burton V. Barnes* 319

Notes

Comparison of two techniques for measuring surface area of conifer needles ..... *Allan P. Drew, Steven W. Running* 231

Shoot and root formation in hypocotyl callus cultures of eucalyptus ..... *Eduardo H. Kitahara, Linda S. Caldas* 242

Rust-free slash pines surviving artificial inoculation potentially useful for resistance breeding ..... *Ronald J. Dinus, Margene M. Griggs* 275

Solving for Weibull diameter distribution parameters to obtain specified mean diameters ..... *Alan R. Ek, James N. Issos, Robert L. Bailey* 290

Production, propagation, and shoot elongation of cuttings from sheared 1-year-old Douglas-fir seedlings ..... *Stephen D. Ross* 298

Reviews

Remote sensing: techniques for environmental analysis ..... *Reviewed by Robert C. Heller* 244

Principles of environmental science ..... *Reviewed by Wm. H. Davis McGregor* 261

Environmental economics: a theoretical inquiry ..... *Reviewed by David B. Field* 267

Plant growth and development (2nd edition) ..... *Reviewed by Gregory N. Brown* 317

Number 4, December 1975

Genetic variances of Scotch pine: Environment and age effects ..... *G. M. Schrum, H. D. Gerhold, R. F. West, L. S. Hamilton* 330

Genetic variation and breeding of Scots pine in the Netherlands ..... *A. E. Squillace, J. G. A. La Bastide, C. L. H. van Vredenburch* 341

Mycorrhizae of exotic trees in the Peruvian Andes and synthesis of ectomycorrhizae on Mexican pines ..... *Donald H. Marx* 353

Uptake and transport of paraquat in slash pine ..... *Claud L. Brown, Lawrence E. Nix* 359

Out-of-roundness in Douglas-fir stems ..... *Richard L. Williamson* 365

Growth and assimilation rate of juvenile northern red oak: Effects of light and temperature ..... *R. E. Farmer, Jr.* 373

Patrol route planning for an airborne infrared forest fire detection system ..... *W. G. O'Regan, P. H. Kourtz, Shirley Nozaki* 382

Fusarium root rot of Douglas-fir seedlings: Suppression by soil fumigation, fertility management, and inoculation with spores of the fungal symbiont *Laccaria laccata* ..... *W. A. Sinclair, D. P. Cowles, S. M. Hee* 390

Temperature, root aeration, and light influence slash pine nutrient uptake rates ..... *Eugene Shoulders, C. W. Ralston* 401

Growth and structural development of red oak sprout clumps ..... *Paul S. Johnson* 413

Evaluating accuracy of tree measurements made with optical instruments ..... *David Bruce* 421

Comparison of diameter growth and crown competition factor in loblolly pine plantations ..... *Mike R. Strub, Richard B. Vasey, Harold E. Burkhart* 427

Notes

Actual evapotranspiration and the natural range of loblolly pine ..... *Chelvadurai Manogaran* 339

Radial distribution of corticular photosynthate in stems of bigtooth and trembling aspen ..... *Robert K. Shepard, Jr.* 370

Anomalous growth of unpollinated shortleaf pine conelets ..... *B. F. McLemore* 399

Eucalyptus provenances tested in Puerto Rico: Two years after outplanting ..... *J. L. Whitmore, F. Macia S.* 410

Thinning method and response to urea in Douglas-fir ..... *Paul Heilman* 418

Announcement

Forest Science manuscript log available for information science and other scholarly studies ..... *William E. Miller* 381

Key-Word Index 433

Author Index 442

Forest Science Monograph 17: Dynamics and simulated yield of Douglas-fir. By Kenneth J. Mitchell. (Mailed concurrently with this issue of *Forest Science* as a separate.)

Key-Word Index

Abies lasiocarpa
Tree strata biomass of subalpine spruce-fir stands in southwestern Colorado, **21:9**

abscisic acid
Effects of applied abscisic acid and plant water stress on transpiration of woody angiosperms. **21:191**

Acacia mearnsii
Effect of site quality and initial stocking density on average diameter in black wattle plantations in Kenya. **21:2**

Acer saccharum
Effects of applied abscisic acid and plant water stress on transpiration of woody angiosperms. **21:191**

Adelges abietis
Phenolic constituents of Norway spruce resistant or susceptible to the eastern spruce gall aphid. **21:180**

adventitious shoots
Shoot and root formation in hypocotyl callus cultures of eucalyptus. **21:242**

afforestation
Mycorrhizae of exotic trees in the Peruvian Andes and synthesis of ectomycorrhizae on Mexican pines. **21:353**

Agrilus bilineatus
Association of twolined chestnut borer and shoestring fungus with mortality of defoliated oak in Connecticut. **21:169**

air pollution
Effect of lead contamination on transpiration and photosynthesis of loblolly pine and autumn olive. **21:33**

airborne fire detection
Patrol route planning for an airborne infrared forest fire detection system. **21:382**

American elm (*see* ***Ulmus americana***).

angiosperms
Effects of applied abscisic acid and plant water stress on transpiration of woody angiosperms. **21:191**

antitranspirant
Effects of applied abscisic acid and plant water stress on transpiration of woody angiosperms. **21:191**

Armillaria mellea
Association of twolined chestnut borer and shoestring fungus with mortality of defoliated oak in Connecticut. **21:169**

artificial inoculation
Rust-free slash pines surviving artificial inoculation potentially useful for resistance breeding. **21:275**

atmospheric effect
Effect of several environmental variables and xylem pressure potential on leaf surface resistance in white oak. **21:201**

autopsy saw
Method for removing wood samples from trees. **21:51**

autumn olive (*see* ***Elaeagnus umbellata***)

auxin
Production, propagation, and shoot elongation of cuttings from sheared 1-year-old Douglas-fir seedlings. **21:298**

bark beetles
Moisture stress and composition of xylem oleoresin in loblolly pine. **21:283**

bark photosynthesis
Radial distribution of corticular photosynthate in stems of bigtooth and trembling aspen. **21:370**

beta density
A class-interval-free method for obtaining expected yields from diameter distributions. **21:67**

bigtooth aspen
Radial distribution of corticular photosynthate in stems of bigtooth and trembling aspen. **21:370**

biological control
Fusarium root rot of Douglas-fir seedlings: suppression by soil fumigation, fertility management, and inoculation with spores of the fungal symbiont *Laccaria laccata*. **21:390**

biomass
Tree strata biomass of subalpine spruce-fir stands in southwestern Colorado. **21:9**
Four-year growth responses of plantation red pine to potash fertilization and irrigation in New York. **21:88**
Nitrogen and carbon regimes in an ecosystem of young dense ponderosa pine in Arizona. **21:163**

black senna (*see* ***Seymeria cassioides***)

black walnut (*see* ***Juglans nigra***)

black wattle (*see* ***Acacia mearnsii***)

blackgum (*see* ***Nyssa sylvatica***)

breeding
Genetic variation and heritability of Melampsora leaf rust resistance in eastern cottonwood. **21:278**

browsing resistance
Clonal variation in monoterpene hydrocarbons of vapors of Douglas-fir foliage. **21:63**

bud activity
Bud and cambial activity in Douglas-fir as related to stem cutting rootability. **21:269**

budbreak
Change in forest canopy affects phenology and development of northern red and scarlet oak seedlings. **21:175**

cambial activity
Bud and cambial activity in Douglas-fir as related to stem cutting rootability. **21:269**

canopy-understory interaction
Canopy-understory interaction effects on forest population structure. **21:98**

carbohydrate distribution
Distribution of carbohydrates in deformed seedling root systems. **21:263**

carbon-14
Distribution of carbohydrates in deformed seedling root systems. **21:263**

chiasmata frequency
Meiotic pairing and chromosome morphology in American elm. **21:123**

chromosome morphology
Meiotic pairing and chromosome morphology in American elm. **21:123**

Citrus mitis
Effects of applied abscisic acid and plant water stress on transpiration of woody angiosperms. **21:191**

clonal differences
Production, propagation, and shoot elongation of cuttings from sheared 1-year-old Douglas-fir seedlings. **21:298**
cobalt accumulation
Cobalt accumulation and circulation by blackgum trees. **21:222**
comparative physiology
Comparative physiology of eastern and western white pines: oleoresin composition and viscosity. **21:214**
competition
Comparison of diameter growth and crown competition factor in loblolly pine plantations. **21:427**
competition ratio
Competition ratio dynamics for improved mortality estimates in simulated growth of forest stands. **21:46**
cone development
Anomalous growth of unpollinated shortleaf pine conelets. **21:399**
coppice
Growth and structural development of red oak sprout clumps. **21:413**
cortex
Radial distribution of corticular photosynthate in stems of bigtooth and trembling aspen. **21:370**
Cronartium fusiforme
Soil and tissue nutrients, soil drainage, fertilization and tree growth as related to fusiform rust incidence in slash pine. **21:141**
Rust-free slash pines surviving artificial inoculation potentially useful for resistance breeding. **21:275**
crown competition factor
Comparison of diameter growth and crown competition factor in loblolly pine plantations. **21:427**
crown fuels
Crown-fire potential in a sequoia forest after prescribed burning. **21:83**
Cupressus macrocarpa
Mycorrhizae of exotic trees in the Peruvian Andes and synthesis of ectomycorrhizae on Mexican pines. **21:353**

decision model
Patrol route planning for an airborne infrared forest fire detection system. **21:382**
decisionmaking
Optimal policies for managed stands: an infinite horizon Markov decision process approach. **21:109**
defoliation
Association of twolined chestnut borer and shoestring fungus with mortality of defoliated oak in Connecticut. **21:169**
A simulation model of gypsy moth-forest interaction. **21:233**
deformed seedling root systems
Distribution of carbohydrates in deformed seedling root systems. **21:263**
dehardening
Effect of night temperature on dehardening in black walnut seedlings. **21:313**
demand
A model of pulpwood production and trade in Wisconsin and the Lake States. **21:301**
Dendroctonus frontalis
Moisture stress and composition of xylem oleoresin in loblolly pine. **21:283**
dendrometers
Evaluating accuracy of tree measurements made with optical instruments. **21:421**
diameter distributions
A class-interval-free method for obtaining expected yields from diameter distributions. **21:67**
diameter growth
Comparison of diameter growth and crown competition factor in loblolly pine plantations. **21:427**
disease resistance
Variation in tolerance of American elm to the Verticillium wilt fungus. **21:227**
Rust-free slash pines surviving artificial inoculation potentially useful for resistance breeding. **21:275**
Douglas-fir (*see* ***Pseudotsuga menziesii***)
drainage
Soil and tissue nutrients, soil drainage, fertilization and tree growth as related to fusiform rust incidence in slash pine. **21:141**
drought tolerance
Drought tolerance of pine seedlings under various climatic conditions. **21:72**

eastern cottonwood (*see* ***Populus deltoides***)
eastern spruce gall aphid (*see* ***Adelges abietis***)
eastern white pine (*see* ***Pinus strobus***)
econometric model
Impact of length-of-run on price elasticities for Douglas-fir and southern pine lumber. **21:13**
A model of pulpwood production and trade in Wisconsin and the Lake States. **21:301**
ectomycorrhiza
Growth and ectomycorrhizal development of loblolly pine seedlings in fumigated soil infested with the fungal symbiont *Pisolithus tinctorius*. **21:245**
Mycorrhizae of exotic trees in the Peruvian Andes and synthesis of ectomycorrhizae on Mexican pines. **21:353**
Elaeagnus umbellata
Effect of lead contamination on transpiration and photosynthesis of loblolly pine and autumn olive. **21:33**
Engelmann spruce
Tree strata biomass of subalpine spruce-fir stands in southwestern Colorado. **21:9**
episodic shoot elongation
Growth and assimilation rate of juvenile northern red oak: effects of light and temperature. **21:373**
Eucalyptus alba
Shoot and root formation in hypocotyl callus cultures of eucalyptus. **21:242**
Eucalyptus provenances tested in Puerto Rico: two years after outplanting. **21:410**
Eucalyptus decaisneana
Eucalyptus provenances tested in Puerto Rico: two years after outplanting. **21:410**
Eucalyptus deglupta
Eucalyptus provenances tested in Puerto Rico: two years after outplanting. **21:410**
Eucalyptus globulus
Mycorrhizae of exotic trees in the Peruvian Andes and synthesis of ectomycorrhizae on Mexican pines. **21:353**
evapotranspiration
Actual evapotranspiration and the natural range of loblolly pine. **21:339**

fertilizer application
Four-year growth responses of plantation red pine to potash fertilization and irrigation in New York. **21:88**
Soil and tissue nutrients, soil drainage, fertilization and tree growth as related to fusiform rust incidence in slash pine. **21:141**
Thinning method and response to urea in Douglas-fir. **21:418**
fire hazard
Estimating moisture content of heavy forest fuels. **21:135**
foliage monoterpenes
Clonal variation in monoterpene hydrocarbons of vapors of Douglas-fir foliage. **21:63**
foliar analysis
Cobalt accumulation and circulation by blackgum trees. **21:222**
forest canopy
Change in forest canopy affects phenology and development of northern red and scarlet oak seedlings. **21:175**
forest fire detection system
Patrol route planning for an airborne infrared forest fire detection system. **21:382**
forest floor weight
Forest stand conversion from hardwoods to pines: effects on soil nutrients, microorganisms and forest floor weight during the first seven years. **21:155**
forest fuels
Estimating moisture content of heavy forest fuels. **21:135**
forest management
Optimal policies for managed stands: an infinite horizon Markov decision process approach. **21:109**
forest production
Tree strata biomass of subalpine spruce-fir stands in southwestern Colorado. **21:9**
Fraxinus americana
Effects of applied abscisic acid and plant water stress on transpiration of woody angiosperms. **21:191**
fuel moisture
Estimating moisture content of heavy forest fuels. **21:135**
fuel reduction
Crown-fire potential in a sequoia forest after prescribed burning. **21:83**
fungal symbiont
Fusarium root rot of Douglas-fir seedlings: suppression by soil fumigation, fertility management, and inoculation with spores of the fungal symbiont *Laccaria laccata*. **21:390**
Fusarium root rot
Fusarium root rot of Douglas-fir seedlings: suppression by soil fumigation, fertility management, and inoculation with spores of the fungal symbiont *Laccaria laccata*. **21:390**
fusiform rust
Soil and tissue nutrients, soil drainage, fertilization and tree growth as related to fusiform rust incidence in slash pine. **21:141**

genetic variation
Clonal variation in monoterpene hydrocarbons of vapors of Douglas-fir foliage. **21:63**
Comparative physiology of eastern and western white pines: oleoresin composition and viscosity. **21:214**
Variation in tolerance of American elm to the Verticillium wilt fungus. **21:227**
Rust-free slash pines surviving artificial inoculation potentially useful for resistance breeding. **21:275**
Genetic variation and heritability of Melampsora leaf rust resistance in eastern cottonwood. **21:278**
Genetic variations of Scotch pine: environment and age effects. **21:330**
Genetic variation and breeding of Scots pine in the Netherlands. **21:341**
Growth and assimilation rate of juvenile northern red oak: effects of light and temperature. **21:373**
genotype-environment interactions
Genetic variations of Scotch pine: environment and age effects. **21:330**
glass-bead technique
Comparison of two techniques for measuring surface area of conifer needles. **21:231**
growth
Thinning method and response to urea in Douglas-fir. **21:418**
growth analysis
Growth and assimilation rate of juvenile northern red oak: effects of light and temperature. **21:373**
gypsy moth (*see* ***Porthetria dispar***)

hardwood stand conversion
Forest stand conversion from hardwoods to pines: effects on soil nutrients, microorganisms and forest floor weight during the first seven years. **21:155**
height growth
Four-year growth responses of plantation red pine to potash fertilization and irrigation in New York. **21:88**
Correlation between nursery and plantation height growth in slash and loblolly pine. **21:197**
Rust-free slash pines surviving artificial inoculation potentially useful for resistance breeding. **21:275**
hemiparasite
Early root development and anatomical parasite-host relationships of black senna with slash pine. **21:239**
herbicide translocation
Uptake and transport of paraquat in slash pine. **21:359**
heritability
Genetic variation and heritability of Melampsora leaf rust resistance in eastern cottonwood. **21:278**
Heterodera rostochiensis
Mycorrhizae of exotic trees in the Peruvian Andes and synthesis of ectomycorrhizae on Mexican pines. **21:353**
Hydnangium carneum
Mycorrhizae of exotic trees in the Peruvian Andes and synthesis of ectomycorrhizae on Mexican pines. **21:353**
***Hysterangium* sp.**
Mycorrhizae of exotic trees in the Peruvian Andes and synthesis of ectomycorrhizae on Mexican pines. **21:353**

illuminance
Temperature, root aeration, and light influence slash pine nutrient uptake rates. **21:401**

impoundments
Mycorrhizae and soil microflora in a green-tree reservoir. **21:36**
infrared fire detection system
Patrol route planning for an airborne infrared forest fire detection system. **21:382**
inventory
A model of pulpwood production and trade in Wisconsin and the Lake States. **21:301**
irrigation
Four-year growth responses of plantation red pine to potash fertilization and irrigation in New York. **21:88**

Juglans nigra
Black walnut seeding growth in wind protected microenvironments. **21:293**
Effect of night temperature on dehardening in black walnut seedlings. **21:313**

Laccaria laccata
Fusarium root rot of Douglas-fir seedlings: suppression by soil fumigation, fertility management, and inoculation with spores of the fungal symbiont *Laccaria laccata*. **21:390**
Lake States pulpwood
A model of pulpwood production and trade in Wisconsin and the Lake States. **21:301**
lead contamination
Effect of lead contamination on transpiration and photosynthesis of loblolly pine and autumn olive. **21:33**
leaf surface resistance
Effect of several environmental variables and xylem pressure potential on leaf surface resistance in white oak. **21:201**
light intensity
Stomatal responses to changes in light intensity as influenced by plant water stress. **21:129**
lightwood
Uptake and transport of paraquat in slash pine. **21:359**
Liquidambar styraciflua
Mycorrhizae and soil microflora in a green-tree reservoir. **21:36**
Liriodendron tulipifera
Stem anatomy of 30-year-old yellow-poplar. **21:23**
Seasonal respiration rates of yellow-poplar roots by diameter classes. **21:185**
litter decomposition
Cobalt accumulation and circulation by black-gum trees. **21:222**
loblolly pine (*see* ***Pinus taeda***)
longleaf pine (*see* ***Pinus palustris***)
Lophodermium pinastri
Genetic variation and breeding of Scots pine in the Netherlands. **21:341**
lumber industry
An estimate of technological progress in the lumber and wood-products industry. **21:149**

managed stands
Optimal policies for managed stands: an infinite horizon Markov decision process approach. **21:109**
Markov process
Competition ratio dynamics for improved mortality estimates in simulated growth of forest stands. **21:46**
Optimal policies for managed stands: an infinite horizon Markov decision process approach. **21:109**
mass propagaton
Production, propagation, and shoot elongation of cuttings from sheared 1-year-old Douglas-fir seedlings. **21:298**
mathematical models
Competition ratio dynamics for improved mortality estimates in simulated growth of forest stands. **21:46**
A class-interval-free method for obtaining expected yields from diameter distributions. **21:67**
mathematical programing
Patrol route planning for an airborne infrared forest fire detection system. **21:382**
measurement accuracy
Evaluating accuracy of tree measurements made with optical instruments. **21:421**
***Melampsora* leaf rust**
Genetic variation and heritability of Melampsora leaf rust resistance in eastern cottonwood. **21:278**
mensuration
Evaluating accuracy of tree measurements made with optical instruments. **21:421**
metabolism
Seasonal respiration rates of yellow-poplar roots by diameter classes. **21:185**
Mexican pines
Mycorrhizae of exotic trees in the Peruvian Andes and synthesis of ectomycorrhizae on Mexican pines. **21:353**
microenvironment
Black walnut seeding growth in wind protected microenvironments. **21:293**
microorganisms
Forest stand conversion from hardwoods to pines: effects on soil nutrients, microorganisms and forest floor weight during the first seven years. **21:155**
mineral cycling
Cobalt accumulation and circulation by black-gum trees. **21:222**
mitosis
Meiotic pairing and chromosome morphology in American elm. **21:123**
model building
Patrol route planning for an airborne infrared forest fire detection system. **21:382**
moisture stress
Moisture stress and composition of xylem oleoresin in loblolly pine. **21:283**
monoterpene hydrocarbons
Moisture stress and composition of xylem oleoresin in loblolly pine. **21:283**
monoterpenes
Clonal variation in monoterpene hydrocarbons of vapors of Douglas-fir foliage. **21:63**
Comparative physiology of eastern and western white pines: oleoresin composition and viscosity. **21:214**
morphology
Phenotypic variation of trembling aspen in western North America. **21:319**
mortality
Effect of site quality and initial stocking density on average diameter in black wattle plantations in Kenya. **21:2**
mortality estimates
Competition ratio dynamics for improved mortality estimates in simulated growth of forest stands. **21:46**

multivariate analysis
Phenotypic variation of trembling aspen in western North America. **21:319**
mycorrhizae
Mycorrhizae and soil microflora in a green-tree reservoir. **21:36**
Mycorrhizae of exotic trees in the Peruvian Andes and synthesis of ectomycorrhizae on Mexican pines. **21:353**
mycorrhizal inoculation
Fusarium root rot of Douglas-fir seedlings: suppression by soil fumigation, fertility management, and inoculation with spores of the fungal symbiont *Laccaria laccata*. **21:390**

needle cast
Genetic variation and breeding of Scots pine in the Netherlands. **21:341**
needle surface area measurement
Comparison of two techniques for measuring surface area of conifer needles. **21:231**
northern red oak (*see* ***Quercus rubra***)
Norway spruce
Phenolic constituents of Norway spruce resistant or susceptible to the eastern spruce gall aphid. **21:180**
nursery management
Fusarium root rot of Douglas-fir seedlings: suppression by soil fumigation, fertility management, and inoculation with spores of the fungal symbiont *Laccaria laccata*. **21:390**
nutrient absorption
Temperature, root aeration, and light influence slash pine nutrient uptake rates. **21:401**
nutrient regimes
Nitrogen and carbon regimes in an ecosystem of young dense ponderosa pine in Arizona. **21:163**
nutrients
Soil and tissue nutrients, soil drainage, fertilization and tree growth as related to fusiform rust incidence in slash pine. **21:141**
Nyssa sylvatica
Cobalt accumulation and circulation by blackgum trees. **21:222**

oak (*see* ***Quercus***)
obligate parasite
Early root development and anatomical parasite-host relationships of black senna with slash pine. **21:239**
oleoresin
Comparative physiology of eastern and western white pines: oleoresin composition and viscosity. **21:214**
Uptake and transport of paraquat in slash pine. **21:359**
optical instruments
Evaluating accuracy of tree measurements made with optical instruments. **21:421**
optical planimeter
Comparison of two techniques for measuring surface area of conifer needles. **21:231**
organic arsenicals
Thinning method and response to urea in Douglas-fir. **21:418**

paleobotany
Phenotypic variation of trembling aspen in western North America. **21:319**
paraquat
Uptake and transport of paraquat in slash pine. **21:359**
parasite-host relationship
Early root development and anatomical parasite-host relationships of black senna with slash pine. **21:239**
phenolics
Phenolic constituents of Norway spruce resistant or susceptible to the eastern spruce gall aphid. **21:180**
phenology
Change in forest canopy affects phenology and development of northern red and scarlet oak seedlings. **21:175**
phenotypic variation
Phenotypic variation of trembling aspen in western North America. **21:319**
photosynthate
Radial distribution of corticular photosynthate in stems of bigtooth and trembling aspen. **21:370**
photosynthesis
Effect of lead contamination on transpiration and photosynthesis of loblolly pine and autumn olive. **21:33**
Picea abies
Phenolic constituents of Norway spruce resistant or susceptible to the eastern spruce gall aphid. **21:180**
Picea engelmannii
Tree strata biomass of subalpine spruce-fir stands in southwestern Colorado. **21:9**
pine nutrition
Temperature, root aeration, and light influence slash pine nutrient uptake rates. **21:401**
***Pinus* spp.**
Mycorrhizae of exotic trees in the Peruvian Andes and synthesis of ectomycorrhizae on Mexican pines. **21:353**
Pinus echinata
Drought tolerance of pine seedlings under various climatic conditions. **21:72**
Anomalous growth of unpollinated shortleaf pine conelets. **21:399**
Pinus elliottii
Soil and tissue nutrients, soil drainage, fertilization and tree growth as related to fusiform rust incidence in slash pine. **21:141**
Correlation between nursery and plantation height growth in slash and loblolly pine. **21:197**
Early root development and anatomical parasite-host relationships of black senna with slash pine. **21:239**
Rust-free slash pines surviving artificial inoculation potentially useful for resistance breeding. **21:275**
Uptake and transport of paraquat in slash pine. **21:359**
Temperature, root aeration, and light influence slash pine nutrient uptake rates. **21:401**
Pinus halepensis
Mycorrhizae of exotic trees in the Peruvian Andes and synthesis of ectomycorrhizae on Mexican pines. **21:353**
Pinus montezumae
Mycorrhizae of exotic trees in the Peruvian Andes and synthesis of ectomycorrhizae on Mexican pines. **21:353**
Pinus monticola
Comparative physiology of eastern and western white pines: oleoresin composition and viscosity. **21:214**

Pinus oocarpa
Mycorrhizae of exotic trees in the Peruvian Andes and synthesis of ectomycorrhizae on Mexican pines. **21:353**
Pinus palustris
Sprouting ability of longleaf pine. **21:189**
Pinus patula
Mycorrhizae of exotic trees in the Peruvian Andes and synthesis of ectomycorrhizae on Mexican pines. **21:353**
Pinus pondersoa
Nitrogen and carbon regimes in an ecosystem of young dense ponderosa pine in Arizona. **21:163**
Pinus radiata
Drought tolerance of pine seedlings under various climatic conditions. **21:72**
Mycorrhizae of exotic trees in the Peruvian Andes and synthesis of ectomycorrhizae on Mexican pines. **21:353**
Pinus resinosa
Water conduction in lateral roots of red pine. **21:53**
Four-year growth responses of plantation red pine to potash fertilization and irrigation in New York. **21:88**
The communal root system of red pine: water conduction through root grafts. **21:255**
Pinus strobus
Comparative physiology of eastern and western white pines: oleoresin composition and viscosity. **21:214**
Pinus sylvestris
Genetic variations of Scotch pine: environment and age effects. **21:330**
Genetic variation and breeding of Scots pine in the Netherlands. **21:341**
Pinus taeda
Effect of lead contamination on transpiration and photosynthesis of loblolly pine and autumn olive. **21:33**
Effect of repeated drying and rewetting on laboratory germination of stratified loblolly pine seed. **21:61**
Drought tolerance of pine seedlings under various climatic conditions. **21:72**
Forest stand conversion from hardwoods to pines: effects on soil nutrients, microorganisms and forest floor weight during the first seven years. **21:155**
Correlation between nursery and plantation height growth in slash and loblolly pine. **21:197**
Growth and ectomycorrhizal development of loblolly pine seedlings in fumigated soil infested with the fungal symbiont *Pisolithus tinctorius*. **21:245**
Distribution of carbohydrates in deformed seedling root systems. **21:263**
Moisture stress and composition of xylem oleoresin in loblolly pine. **21:283**
Actual evapotranspiration and the natural range of loblolly pine. **21:339**
Comparison of diameter growth and crown competition factor in loblolly pine plantations. **21:427**
Pisolithus tinctorius
Growth and ectomycorrhizal development of loblolly pine seedlings in fumigated soil infested with the fungal symbiont *Pisolithus tinctorius*. **21:245**
plagiotropism
Production, propagation, and shoot elongation of cuttings from sheared 1-year-old Douglas-fir seedlings. **21:298**
plant geography
Phenotypic variation of trembling aspen in western North America. **21:319**
plant resistance
Phenolic constituents of Norway spruce resistant or susceptible to the eastern spruce gall aphid. **21:180**
plant water stress
Effects of applied abscisic acid and plant water stress on transpiration of woody angiosperms. **21:191**
planted seedling root systems
Distribution of carbohydrates in deformed seedling root systems. **21:263**
pollination
Anomalous growth of unpollinated shortleaf pine conelets. **21:399**
poly-cross
Correlation between nursery and plantation height growth in slash and loblolly pine. **21:197**
pondersoa pine (*see* ***Pinus pondersoa***)
Populus deltoides
Genetic variation and heritability of Melampsora leaf rust resistance in eastern cottonwood. **21:278**
Populus grandidentata
Radial distribution of corticular photosynthate in stems of bigtooth and trembling aspen. **21:370**
Populus tremuloides
Phenotypic variation of trembling aspen in western North Ameirca. **21:319**
Radial distribution of corticular photosynthate in stems of bigtooth and trembling aspen. **21:370**
Porthetria dispar
A simulation model of gypsy moth-forest interaction. **21:233**
prescribed burning
Crown-fire potential in a sequoia forest after prescribed burning. **21:83**
price elasticity
Impact of length-of-run on price elasticities for Douglas-fir and southern pine lumber. **21:13**
prices
A model of pulpwood production and trade in Wisconsin and the Lake States. **21:301**
probabilistic models
Optimal policies for managed stands: an infinite horizon Markov decision process approach. **21:109**
probability sampling
Instant- and interval-count sampling: two new techniques for estimating recreation use. **21:40**
productivity
An estimate of technological progress in the lumber and wood-products industry. **21:149**
progeny tests
Correlation between nursery and plantation height growth in slash and loblolly pine. **21:197**
Genetic variation and breeding of Scots pine in the Netherlands. **21:341**
provenance test
Genetic variation and heritability of Melampsora leaf rust resistance in eastern cottonwood. **21:278**
Eucalyptus provenances tested in Puerto Rico: two years after outplanting. **21:410**
Pseudotsuga menziesii
Impact of length-of-run on price elasticities for Douglas-fir and southern pine lumber. **21:13**

Clonal variation in monoterpene hydrocarbons of vapors of Douglas-fir foliage. **21:63**

Bud and cambial activity in Douglas-fir as related to stem cutting rootability. **21:269**

Production, propagation, and shoot elongation of cuttings from sheared 1-year-old Douglas-fir seedlings. **21:298**

Out-of-roundness in Douglas-fir stems. **21:365**

Fusarium root rot of Douglas-fir seedlings: suppression by soil fumigation, fertility management, and inoculation with spores of the fungal symbiont *Laccaria laccata*. **21:390**

Thinning method and response to urea in Douglas-fir. **21:418**

pulpwood production

A model of pulpwood production and trade in Wisconsin and the Lake States. **21:301**

Quercus

Association of twolined chestnut borer and shoestring fungus with mortality of defoliated oak in Connecticut. **21:169**

Quercus alba

Effect of several environmental variables and xylem pressure potential on leaf surface resistance in white oak. **21:201**

Quercus coccinea

Change in forest canopy affects phenology and development of northern red and scarlet oak seedlings. **21:175**

Quercus lyrata

Mycorrhizae and soil microflora in a green-tree reservoir. **21:36**

Quercus nuttallii

Mycorrhizae and soil microflora in a green-tree reservoir. **21:36**

Quercus phellos

Mycorrhizae and soil microflora in a green-tree reservoir. **21:36**

Quercus rubra

Change in forest canopy affects phenology and development of northern red and scarlet oak seedlings. **21:175**

Growth and assimilation rate of juvenile northern red oak: effects of light and temperature. **21:373**

Growth and structural development of red oak sprout clumps. **21:413**

radial growth

Four-year growth responses of plantation red pine to potash fertilization and irrigation in New York. **21:88**

recreation use

Instant- and interval-count sampling: two new techniques for estimating recreation use. **21:40**

red oak (*see* ***Quercus rubra***)

red pine (*see* ***Pinus resinosa***)

regeneration

Growth and structural development of red oak sprout clumps. **21:413**

resin acids

Comparative physiology of eastern and western white pines: oleoresin composition and viscosity. **21:214**

Moisture stress and composition of xylem oleoresin in loblolly pine. **21:283**

resin soaking

Uptake and transport of paraquat in slash pine. **21:359**

resistance breeding

Rust-free slash pines surviving artificial inoculation potentially useful for resistance breeding. **21:275**

resource allocation

Patrol route planning for an airborne infrared forest fire detection system. **21:382**

respiration

Seasonal respiration rates of yellow-poplar roots by diameter classes. **21:185**

root aeration

Temperature, root aeration, and light influence slash pine nutrient uptake rates. **21:401**

root development

Early root development and anatomical parasite-host relationships of black senna with slash pine. **21:239**

root disease

Fusarium root rot of Douglas-fir seedlings: suppression by soil fumigation, fertility management, and inoculation with spores of the fungal symbiont *Laccaria laccata*. **21:390**

root grafts

The communal root system of red pine: water conduction through root grafts. **21:255**

root initiation

Bud and cambial activity in Douglas-fir as related to stem cutting rootability. **21:269**

root respiration

Seasonal respiration rates of yellow-poplar roots by diameter classes. **21:185**

root systems

Distribution of carbohydrates in deformed seedling root systems. **21:263**

rust resistance

Genetic variation and heritability of Melampsora leaf rust resistance in eastern cottonwood. **21:278**

sampling

Instant- and interval-count sampling: two new techniques for estimating recreation use. **21:40**

sapling-small pole stands

Nitrogen and carbon regimes in an ecosystem of young dense pondersoa pine in Arizona. **21:163**

scarlet oak (*see* ***Quercus coccinea***)

Scotch pine (*see* ***Pinus sylvestris***)

seed moisture content

Effect of repeated drying and rewetting on laboratory germination of stratified loblolly pine seed. **21:61**

seedling dehardening

Effect of night temperature on dehardening in black walnut seedlings. **21:313**

seedling growth

Change in forest canopy affects phenology and development of northern red and scarlet oak seedlings. **21:175**

Black walnut seeding growth in wind protected microenvironments. **21:293**

selection

Genetic variation and heritability of Melampsora leaf rust resistance in eastern cottonwood. **21:278**

senna seymeria (*see* ***Seymeria cassioides***)

Sequoiadendron giganteum

Crown-fire potential in a sequoia forest after prescribed burning. **21:83**

Seymeria cassioides

Early root development and anatomical parasite-host relationships of black senna with slash pine. **21:239**

shoestring fungus (*see* ***Armillaria mellea***)
shoot formation
Shoot and root formation in hypocotyl callus cultures of eucalyptus. **21:242**
shortleaf pine (*see* ***Pinus echinata***)
simulation
A simulation model of gypsy moth-forest interaction. **21:233**
Solving for Weibull diameter distribution parameters to obtain specified mean diameters. **21:290**
single-cross
Correlation between nursery and plantation height growth in slash and loblolly pine. **21:197**
site quality
Effect of site quality and initial stocking density on average diameter in black wattle plantations in Kenya. **21:2**
slash pine (*see* ***Pinus elliottii***)
soil microflora
Mycorrhizae and soil microflora in a greentree reservoir. **21:36**
soil nutrients
Forest stand conversion from hardwoods to pines: effects on soil nutrients, microorganisms and forest floor weight during the first seven years. **21:155**
solar radiation
Black walnut seeding growth in wind protected microenvironments. **21:293**
southern pine
Impact of length-of-run on price elasticities for Douglas-fir and southern pine lumber. **21:13**
spacing
Canopy-understory interaction effects on forest population structure. **21:98**
species trial
Eucalyptus provenances tested in Puerto Rico: two years after outplanting. **21:410**
sprouting ability
Sprouting ability of longleaf pine. **21:189**
stand conversion
Forest stand conversion from hardwoods to pines: effects on soil nutrients, microorganisms and forest floor weight during the first seven years. **21:155**
stand diameter
Effect of site quality and initial stocking density on average diameter in black wattle plantations in Kenya. **21:2**
stand growth
Canopy-understory interaction effects on forest population structure. **21:98**
stand structure
Canopy-understory interaction effects on forest population structure. **21:98**
stand tables
Solving for Weibull diameter distribution parameters to obtain specified mean diameters. **21:290**
stem anatomy
Stem anatomy of 30-year-old yellow-poplar. **21:23**
stem cross-section area
Out-of-roundness in Douglas-fir stems. **21:365**
stem diameter measurement
Out-of-roundness in Douglas-fir stems. **21:365**
stocking density
Effect of site quality and initial stocking density on average diameter in black wattle plantations in Kenya. **21:2**
stomata
Stomatal responses to changes in light intensity as influenced by plant water stress. **21:129**
Effect of several environmental variables and xylem pressure potential on leaf surface resistance in white oak. **21:201**
stump sprouting
Growth and structural development of red oak sprout clumps. **21:413**
subalpine fir (*see* ***Abies lasiocarpa***)
supply and demand
Impact of length-of-run on price elasticities for Douglas-fir and southern pine lumber. **21:13**
symbiotic fungi
Growth and ectomycorrhizal development of loblolly pine seedlings in fumigated soil infested with the fungal symbiont *Pisolithus tinctorius*. **21:245**

technological progress
An estimate of technological progress in the lumber and wood-products industry. **21:149**
temperature
Seasonal respiration rates of yellow-poplar roots by diameter classes. **21:185**
Temperature, root aeration, and light influence slash pine nutrient uptake rates. **21:401**
tetrazolium chloride
Effect of night temperature on dehardening in black walnut seedlings. **21:313**
Thelephora terrestris
Growth and ectomycorrhizal development of loblolly pine seedlings in fumigated soil infested with the fungal symbiont *Pisolithus tinctorius*. **21:245**
thin layer chromatography
Phenolic constituents of Norway spruce resistant or susceptible to the eastern spruce gall aphid. **21:180**
thinning
Canopy-understory interaction effects on forest population structure. **21:98**
Thinning method and response to urea in Douglas-fir. **21:418**
timber production
Optimal policies for managed stands: an infinite horizon Markov decision process approach. **21:109**
tissue culture
Shoot and root formation in hypocotyl callus cultures of eucalyptus. **21:242**
transition matrices
A simulation model of gypsy moth-forest interaction. **21:233**
translocation
Stem anatomy of 30-year-old yellow-poplar. **21:23**
Distribution of carbohydrates in deformed seedling root systems. **21:263**
Radial distribution of corticular photosynthate in stems of bigtooth and trembling aspen. **21:370**
transpiration
Effect of lead contamination on transpiration and photosynthesis of loblolly pine and autumn olive. **21:33**
Stomatal responses to changes in light intensity as influenced by plant water stress. **21:129**
Effects of applied abscisic acid and plant water stress on transpiration of woody angiosperms. **21:191**

tree growth
Soil and tissue nutrients, soil drainage, fertilization and tree growth as related to fusiform rust incidence in slash pine. **21:141**
tree improvement
Genetic variation and breeding of Scots pine in the Netherlands. **21:341**
Eucalyptus provenances tested in Puerto Rico: two years after outplanting. **21:410**
tree measurements
Evaluating accuracy of tree measurements made with optical instruments. **21:421**
trembling aspen (*see* ***Populus tremuloides***)
tropical silviculture
Eucalyptus provenances tested in Puerto Rico: two years after outplanting. **21:410**
twolined chestnut borer (*see* ***Agrilus bilineatus***)

Ulmus americana
Meiotic pairing and chromosome morphology in American elm. **21:123**
Variation in tolerance of American elm to the Verticillium wilt fungus. **21:227**
undercooling
Effect of night temperature on dehardening in black walnut seedlings. **21:313**
upper-stem measurements
Evaluating accuracy of tree measurements made with optical instruments. **21:421**
urea
Thinning method and response to urea in Douglas-fir. **21:418**

vegetative propagation
Bud and cambial activity in Douglas-fir as related to stem cutting rootability. **21:269**
Production, propagation, and shoot elongation of cuttings from sheared 1-year-old Douglas-fir seedlings. **21:298**
Verticillium albo-atrum
Variation in tolerance of American elm to the Verticillium wilt fungus. **21:227**

water conduction
Water conduction in lateral roots of red pine. **21:53**
The communal root system of red pine: water conduction through root grafts. **21:255**
water potential
Stomatal responses to changes in light intensity as influenced by plant water stress. **21:129**
water relations
Effect of several environmental variables and xylem pressure potential on leaf surface resistance in white oak. **21:201**
water stress
Drought tolerance of pine seedlings under various climatic conditions. **21:72**
Stomatal responses to changes in light intensity as influenced by plant water stress. **21:129**
weather effects
Estimating moisture content of heavy forest fuels. **21:135**
Weibull density
A class-interval-free method for obtaining expected yields from diameter distributions. **21:67**
Weibull distribution parameters
Solving for Weibull diameter distribution parameters to obtain specified mean diameters. **21:290**
western white pine (*see* ***Pinus monticola***)
white oak (*see* ***Quercus alba***)
wilt fungus
Variation in tolerance of American elm to the Verticillium wilt fungus. **21:227**
wind barriers
Black walnut seeding growth in wind protected microenvironments. **21:293**
winter injury
Effect of night temperature on dehardening in black walnut seedlings. **21:313**
wood-products industry
An estimate of technological progress in the lumber and wood-products industry. **21:149**
wood sample extraction
Method for removing wood samples from trees. **21:51**
wood structure
Stem anatomy of 30-year-old yellow-poplar. **21:23**

xylem
Water conduction in lateral roots of red pine. **21:53**
The communal root system of red pine: water conduction through root grafts. **21:255**
Bud and cambial activity in Douglas-fir as related to stem cutting rootability. **21:269**
xylem oleoresin
Moisture stress and composition of xylem oleoresin in loblolly pine. **21:283**
xylem pressure potential
Effect of several environmental variables and xylem pressure potential on leaf surface resistance in white oak. **21:201**
xylem sap tension
Black walnut seeding growth in wind protected microenvironments. **21:293**
xylem transport
Uptake and transport of paraquat in slash pine. **21:359**

yellow-poplar (*see* ***Liriodendron tulipifera***)
yields
A class-interval-free method for obtaining expected yields from diameter distributions. **21:67**
